CATALOGUE

OF

BOOKS

IN THE LIBRARY OF :

The

Royal College of

Dental Surgeons

TORONTO

The Library has subscribed to the Dental Index Bureau, which will be of great assistance to Students and others using the Library.

This index will be published in two parts, one being an author index, the other a subject index. The author index will contain all the writings, biographical sketches and important personal notices, arranged alphabetically according to the authors' names; all of the writings of each author together. The subject index will contain all original articles, papers read before societies, editorials, book reviews, important selected articles and abstracts, arranged according to subjects, and the subjects themselves will be so classified and arranged that related subjects will be grouped. All of the writings on each subject will be together.

Until this system is in good working order, the Students are urged to avail themselves of the present card index system, which classifies the journals in two classes, viz., under the subject name and the author's name.

It is anticipated that with the increased attention the College Library is receiving, it will be found more interesting and instructive than formerly, and that the Student body will be greatly profited thereby.
